MARCH 17, 2026

Matt | Varghese Mathew

Software Systems Architect

Software Systems Architect with 20 years of experience designing large-scale interoperable health platforms. Technical leader for Epic's HL7 FHIR-based CMS 2027 regulatory implementation, standardizing prior-authorization workflows for hundreds of customers. Recognized interoperability expert transforming fragmented integrations into unified, maintainable platforms, with deep expertise in HL7 FHIR, SMART on FHIR, CDS Hooks, OAuth2, and modern web architectures.

WORK EXPERIENCE

Software Systems Architect, Health Plans

Epic - Verona, WI — *MARCH 2021 - PRESENT*

Delivered CMS 2027 interoperability (HL7 CRD/DTR/PAS)

- Architect for Epic's payer implementation of HL7 Da Vinci CRD/DTR/PAS to automate prior authorization, reducing turnaround time from days to minutes.
- Refined specifications in collaboration with HL7 standards bodies and third-party vendors. Developed independent comprehensive testing suite for the same.
- Recognized expert on CRD, DTR, and PAS at Epic and in the industry.

Unified fragmented Prior Authorization requirements

- Architected centralized 'Source of Truth' for authorization requirements, eliminating data silos across all of Epic's health plan product lines.
- Engineered unified data models and processing logic to improve consistency and reduce overhead, decreasing development lead time by 80% for 12+ modules.

Modernized Medical Necessity guideline review integrations

- Payers use Medical Necessity Guideline integrations with MCG, InterQual etc. to review appropriateness of requested care for the patient's clinical scenario.
- Led modernization of Epic's Medical Necessity Guideline Review integrations using SMART on FHIR. Engineered full-stack emulator, reducing defects by 60%.
- Recognized expert on Medical Necessity Review and SMART on FHIR at Epic.

Senior Software Systems Developer, Clinical Informatics

Epic - Verona, WI — *AUG. 2010 - MARCH 2021*

Enabled Push Notifications for all Epic Mobile Apps

- Led team of staff and interns developing broker service routing all Epic customer-generated push notifications on all Epic mobile apps to APNS and GCM.
- Designed with high-availability and redundancy. Among the first Epic production applications deployed on Azure reducing cost by over a factor of 10.
- Responsible for oversight and production deployment for three years with traffic in millions per week and minimal downtime.

PROJECTS

FHIR-based AI Assistant

2025 Q2

Demonstrates seamless integration of LLM APIs with HL7 FHIR for agentic use-cases.

LLM chat web app to answer provider and patient questions using real EHR data.

Can be leveraged for AI driven forms, clinical decision support, care delivery, etc.

JSON Parser for M/Caché

2020

Spotlights long-term vision in creating powerful generic reusable tooling.

RFC-compliant JSON Serializer and Deserializer for ANSI-M/Caché.

Nearly Half of all Epic's Database AI integrations leverage this library.

Web Based SSH Client

2025 Q3

Out-of-the-box solutioning for real world cost reduction avoiding remote-app licenses for moderated shell / text access to servers.

Proof of concept fully browser-based SSH client for unix servers, Caché etc.

github.com/mattvarghese/WebSSHClient

HTTP Auto-responder

2024 Q4

Development tooling for Web APIs, keeping traffic within the enterprise or local network.

REST-ful endpoint allowing auto-responding and logging for common HTTP verbs.

github.com/mattvarghese/HttpResponder

MIPS Pipeline Simulator

2005, 2025

Highlights expertise in low-level systems, architecture, parallelism, and performance.

5-Stage pipeline simulation of a MIPS microprocessor, with cache simulation, assembler, and terminal app developed with POSIX APIs, C++, Flex, and Bison in 2005.

In 2025, developed a Small-C compiler above the assembler with AI assistance.

github.com/mattvarghese/coconut

Centralized 3rd Party Web Application integrations across Epic

- Advocated for and centralized all third party web application integrations across Epic into a single framework for accountability, security, and maintainability.
- Developed and deployed web applications to validate Content Security Policy, Cross Origin Resource Sharing, and a Web Messaging API suite.
- Recognized expert in Web App Integrations and Security at Epic.

Architected Epic's CDS Web Service integration framework

- Architect of all Epic Clinical Decision Support (CDS) Web Service integration capabilities. Includes HL7 FHIR CDS-Hooks and HL7 CDA-based integrations.
- Redesigned the decision support configuration to mirror user mental-model. Developed feedback mechanism for providers to gauge efficacy of decision support.
- Recognized expert in CDS-Hooks and REST-ful Web Services at Epic.

Research Assistant, Condor Distributed Computing

University of Wisconsin - Madison, WI

SEPT. 2008 - MAY 2010

- Virtualized Condor jobs with VMware achieving deterministic runtime environments.

Software Engineer, Enterprise Routing

Cisco Systems - Bangalore, India

JUNE 2006 - JULY 2008

- Platform engineering and configuration tooling for Cisco's enterprise class routers.

INDUSTRY & OUTREACH

- **HL7 FHIR Connectathons:** Developed prototypes of HL7 specifications in collaboration with participants from other vendors to improve interoperability.
- **HL7 Da Vinci Burden Reduction:** Represented Epic on public calls steering development of standards to reduce administrative burden in Prior Authorization.
- **HL7 CDS Hooks and SMART on FHIR:** Contributed to HL7 CDS Hooks and HL7 SMART Web Messaging specifications to enhance workflow integration and security.
- **Epic Recruitment:** Represented Epic at university career fairs and conducted candidate interviews to attract top talent to Epic.

EDUCATION

Master of Science, Computer Science

University of Wisconsin - Madison *2008-2010*

- GPA: 3.94 / 4.0 | Focus: Systems, Networking, Distributed Computing.

Bachelor of Technology, Computer Science and Engineering

National Institute of Technology - Calicut, India *2002-2006*

- CGPA: 9.60 / 10.0 | Department Topper and Gold Medalist.

This Resume!

2026 Q1

Think different! Resume developed as print-media web application with AI assistance.

github.com/mattvarghese/my-resume

SKILLS

Healthcare and Health Insurance

- Domain knowledge • HL7 FHIR
- SMART on FHIR • CDS Hooks
- CRD/DTR/PAS • ANSI X12 278

Full stack development

- TypeScript • React • Web API
- Node and NPM • .NET/C# • SVN
- Git • JSON / JWTs / JWKs • Azure
- Web Hosting • SQL

AI Tools & LLMs

- Orchestrating large solutions with AI
- Maintainable Architecture
- LLM APIs • LLM Connectors

Systems & Networking Strength

- Network Architecture & Routing
- ISO-OSI model • OAuth2
- Worked with several RFCs
- Encryption standards
- Authentication standards

Avid GNU/Linux User

- Virtualization • KVM / Qemu
- VMware • Docker • Hadoop
- Raspberry Pis

EPIC CERTIFICATIONS

Web Tech Camp ⁝ Server Tech Camp ⁝ Clarity Data Model ⁝ EpicCare Inpatient Suite ⁝ Order Transmittal ⁝ Referrals and Authorizations ⁝ Tapestry Health Plan Suite

OTHER

- Novice (H2) rated hang-glider pilot
- Solo endorsed VFR student pilot
- ASA 101,103/104,105 rated sailor
- Learned Elementary Russian as adult
- Avid reader, ice-skating, volleyball, XC-skiing, bicycling
